blackbird your life

# alpine. the trendsetter

For nearly 30 years Alpine has been developing high-end car products – specialising in car audio and navigation systems. Alpine is always a precursor for new technologies, who – based on their knowledge and pioneering spirit – intent on offering a consistently expanding product range to his ambitious customers. The best example for this philosophy is the development of our navigation systems:

**1997**

As one of the first companies on the market, Alpine introduces the CD navigation unit.

**2000**

Alpine launches its DVD navigation unit.

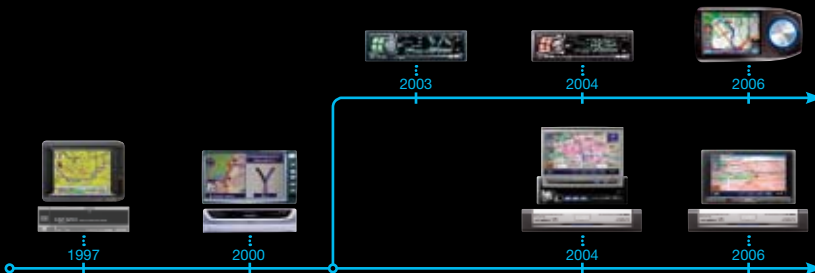

**2002-2004**

Successive technological expansion up to fully integrated Mobile Media Solutions

**2006**

Finally navigation becomes portable and versatile: as a part of an integrated system, or in your hand.

With the blackbird, Alpine now succeeds to realise a technological leap. The blackbird with its versatility is a high-end navigation system, which can be removed to be a portable navigation device.

#### find

# hard facts

- 4 GB hard drive with pre-installed database
- Slim, handy design (145 x 74 x 29 mm)
- Light (227 g) paired with smart and elegant design
- Easy to use via the function button and touchscreen
- Easy menu control through 3,6" antiglare touchscreen display (resolution 320 x 240 pixel)

## Standard Accessories:

- Protective sleeve
- USB cable
- Mains home charger
- Screen cloth
- Windshield mount

## Optional Accessories:

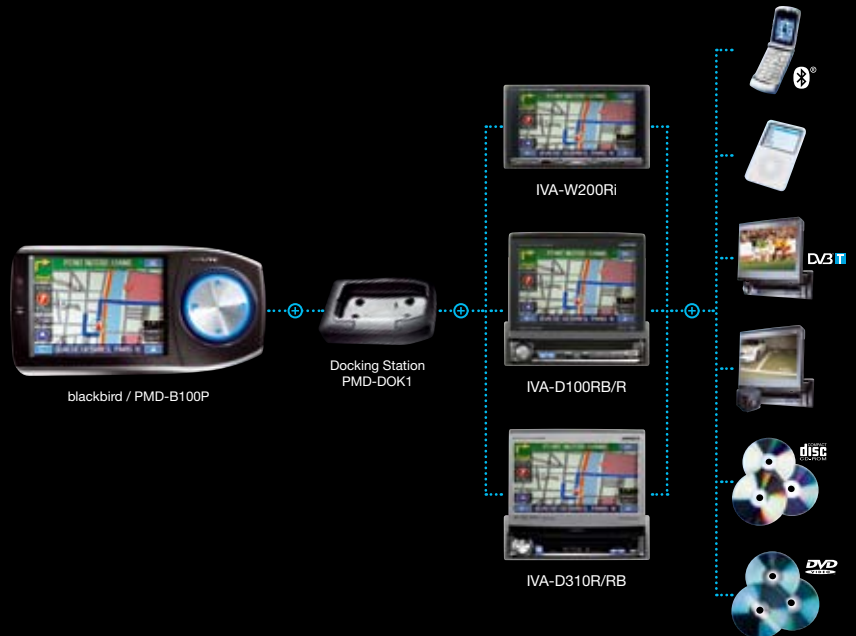

- AV Docking station
- Second car kit
- TMC antenna (with docking station only)
- External GPS antenna
- Extra battery
- Remote control

## a perfect marriage

The blackbird combines the benefits of portable and fixed navigation perfectly: The blackbird works as a stand-alone product, but can also be connected to a fixed AV system via the optional AV

docking station. As soon as the blackbird is docked, the dashboard mobile media takes over the display and control of the blackbird. So your blackbird becomes seamlessly integrated into your Alpine system.
